MEMORANDUM TO THE DIRECTOR

Information: Natural Resources Commission

Subject: Special Muskellunge and Northern Pike Regulations (FO-220)

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, authorizes the Director to provide for better protection and preservation of fish, game and birds.

Discussion and Background:

The three waters proposed for removal from this order are: Cornwall Impoundment (Cheboygan County), West Twin Lake (Montmorency County), and Otsego Lake (Otsego County). The spearing ban that currently exists on these lakes is a product of past tiger muskellunge stocking efforts, which have long since terminated.

Cornwall Impoundment no longer has muskellunge or northern pike in it, thus the spearing ban for this lake is currently not needed. West Twin Lake has a self-sustaining northern pike population and additional spearing effort and angler hours would not hurt this population, since the lake is relatively large (1000+ acres). Otsego Lake has a self-sustaining northern pike population which is enhanced by a local spawning marsh and DNR/Sportsman's Club efforts. This lake is large (2000 acres) and can support additional harvest from spearing. Pure bred muskellunge stocking efforts have also been initiated at Otsego Lake and will be attractive to some darkhouse anglers in the future.

It is anticipated that the proposed regulation changes will not have any negative effect on the local fish communities. Management unit personnel have presented these regulation changes to local sportsman groups who have not opposed the changes. Law Enforcement Division has indicated their support for these regulation changes which will remove three spearing exceptions from the list.
